CUSTOMER FEEDBACK

NEW HOME EXCAVATION

“Todd and his team were extensively involved in the construction of our home. They did the excavation, the trenching for our services, our septic system and our circular driveway. When our home was finished, they did the rough grading and seeding of our 2 acre lot. They also designed and built an impressive multi-tiered stone garden as the focal point of our yard. Throughout, we were very impressed with the knowledge, skill and professionalism of Todd and his team. They were valued members of the construction team on whom we could count on for good advice, timely service and a job well done...” - The Zazulaks, Bay of St. Lawrence, Gananoque

LANDSCAPE CONTRACTING

“We are extremely pleased with the work, Todd Grier, our landscape contractor did for us. He built a gorgeous rock wall to showcase our home; and he coordinated other trades, (irrigation, buried electrical systems, curbs and driveways, at the same time.) As a result of Todd Grier’s fine work, our property is featured in Patricia Singer's Great Gardens To Visit.

He is efficient, knowledgeable and personable with an excellent work ethic, he arrives when he says he will and then doesn't waste a single minute...” - G. Dunlop, Gananoque

WETLAND RESTORATION

“Todd has done a wide variety of work for me on our farm in the 1000 Islands area. Todd and his crew have built roads, excavated ponds, built dams, installed culverts, rearranged drainage ditches, cleaned-up old brush piles and a trash dump, plowed snow and helped build a bridge. The biggest project we did together was a wetland restoration project under the direction of Ducks Unlimited in 2002. Todd and his crew excavated to create an interconnected network of seven ponds and built two dams. This project turned out beautifully.

Todd personally is the best backhoe operator I have ever seen. His crew members also are excellent equipment operators and Todd maintains his equipment to a high standard so breakdowns rarely slow progress. He and his crew do very high quality work and have never damaged surrounding terrain with their equipment. Todd has always been very responsive to my requests and prompt in beginning and completing projects.

I have recommended Todd to friends and family and would recommend him without hesitation...” – W. Ratcliffe, Toronto

SEPTIC SYSTEM INSTALLATION

“We wanted to initially add a second bathroom to our cottage on Charleston Lake, but because of its close proximity to the lake and the latest building requirements we were forced to go through a variance hearing... Since we had dealt with Todd on some small gravel jobs in the past, we contacted him regarding the septic system design. Todd did a great job explaining the local requirements and guidelines to us and designed a system to satisfy our needs and the local municipality guidelines...As it turned out, the variance got completed and Todd did a great job installing the entire state of the art Ecoflo septic system...” – J. Klaben Jr., Tully, New York
